

the **ONE** and  
**# ONLY**

High-performance and gentle crop-friendly storing – **for over 20 years.**

The **GRIMME RH 20 / RH 24 receiving hoppers** include an extensive range of options for optimum crop protection and maximum separation performance. Currently more than **3,000 machines have been sold worldwide**, proving just how popular these machines really are. Therefore, we are offering **attractive equipment packages** for the 2021/2022 season.

**01.11.2021 until 31.10.2022**

**GRIMME**

The **Receiving hoppers RH 20 and RH 24** are ideal for medium to larger farms. The deep pockets at the bottom of the hopper, in combination with the pocket sealing to the side walls, ensure an excellent conveying effect with an impressive self-emptying feature. The soft, wear-resistant polyurethane (PU) spiral rollers are extremely gentle on the crop while maintaining high throughput and effective separation performance at the same time. The infinitely variable drive (standard) and the wide range of configurations allows easy adaptation to various requirements and crops.

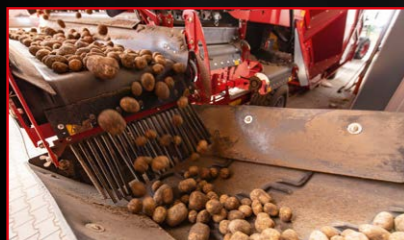

### Turbo Clean

- When the Turbo Clean feature is activated, the polyurethane (PU) spiral rollers are driven at maximum speed for cleaning, the centrifugal forces loosens and removes any built up soil on the rollers
- This operation is conveniently operated via the control terminal on the machine.

### Flow Control

- Line control for a controlled start-stop sequence of the whole storing line, for improved gentle crop handling.
  - Particularly effective in conjunction with the electronic level control "Capacity Control"\* of the hopper for automatic start-up and switch-off.
- \* not included in the configuration package.

### SoftFlow

- Soft, flexible PU fingers for the transfer from one conveyor to the next.
- Easy adjustment of the inclination angle for an optimal crop flow.
- High self-cleaning effect of the transfer support via highly elastic fingers.

### Extension cable for remote control

- For more flexibility and space to move with the operator terminal.

## #theONEandONLY Equipment packages

Equipment package I for the roller package C6 / C9 L.00.005	Equipment package II for the roller package CF L.00.006
Turbo Clean for soil cleaning unit (C)	Turbo Clean for soil cleaning and pre-grading unit (CF)
Flow Control	Flow Control
SoftFlow	SoftFlow
Extension cable for remote control (15 m)	Extension cable for remote control (15 m)
Normal price 2,415.00 €	Normal price 3,230.00 €
<b>Promotion price: 750.00 €</b>	<b>Promotion price: 1,250.00 €</b>
