

Early season discount 2023 VARITRON

01.09.2022 until 15.11.2022

Reserve your

VARITRON 220 / 270 / 470 now!

It's time to invest in a successful and, above all, powerful harvest for 2023!

With every model of the VARITRON series, you can draw on the experience of over 1000 machines built. This reflects special reliability, stability and expertise.

Upgrade your harvester for the next season and benefit from attractive special offers!

GRIMME

A real allrounder

VARITRON 220 Platinum TERRA TRAC | VARITRON 270 Platinum |
VARITRON 270 Platinum TERRA TRAC

With all two-row VARITRON's, GRIMME offers self-propelled harvesters that can be equipped with both a 2 t overloading bunker and a 7 t NonstopBunker. In addition to the enormous range of different separators, you can also choose between a wheeled chassis and rubber tracks. Furthermore, the numerous automatic functions take the strain off the driver, even during long working days.

NonstopBunker

The VARITRON 270 Platinum and VARITRON 270 Platinum TERRA TRAC are equipped with the 7-tonne NonstopBunker. The ingenious design of the GRIMME NonstopBunker allows the bunker floor to be reversed without additional damage to the crop. Another advantage is that the entire bunker capacity can be used when refilling.

Real nonstop digging

The VARITRON 220 Platinum TERRA TRAC is equipped with a 2 t intermediate bunker with 1200 mm wide overloading elevator directly behind the cab. This means that transport vehicles and boxes can be filled without any problems during the harvesting process.

At home in carrots too

For carrot and onion harvesting, the VARITRON can be equipped with various features. In this way, the machine can be utilised as efficiently as possible in an extended season.

Wide range of separators

You have the choice of a wide range of separators to match your unique harvesting conditions. The extremely powerful TurboSep (blower) removes loose haulm and other components for maximum admixture separation.

New generation - same characteristics

VARITRON 470 | VARITRON 470 TERRA TRAC

Self-propelled harvesters excel with the perfectly matched combination of performance, driving comfort and manoeuvrability. The resulting harvest reliability, even under the most difficult conditions, plays a decisive role in many cases. With the VARITRON 470 and the VARITRON 470 Platinum TERRA TRAC, GRIMME offers 4-row self-propelled harvesters, which can be equipped with a wide range of different separators. Choose your favourite with large-volume wheels or ground-protecting rubber tracks with a contact area of 1.6 m² each.

New haulm topper

The drive power of the haulm topper was increased to ensure an optimal chopping of large amounts of potato haulm. Safe and ergonomic work on the lower side of the haulm topper is achieved with the new, integrated maintenance position by folding the haulm topper upwards.

Unlimited flexibility

It is not only in potatoes that the new VARITRON impresses with its power, but also in onions and carrots. With the new intake for windrowed potatoes (brush web or rubber paddle) and the various options for carrot intake, the VARITRON can be utilised to even potential.

Increased unloading distance

The bunker extension is particularly suitable for opening/starting on long fields. At a row width of 75 cm, the transport trailer can drive in the spraying tracks and can be loaded across four rows without damage or loss. In particular high transport trailers and boxes in the second row of the trailer can be filled in a simple and safe manner.

Everything in sight

The SmartView video system with up to 13 cameras provides the best overview of all machine functions. This always enables optimal setting of the machine. Further advantages are the possibility of live slow motion, zoom function and the integrated Visual Protect PRO.
